High Ridge Hip & Ridge Shingles

High Ridge Hip & Ridge shingles are uniquely color matched to the *Duration* Series Shingles Designer Colors Collection. The multiple color blends are only available from Owens Corning™ Roofing and offer a finished look for the roof.

Keep your beautiful roof functioning beautifully too.

It takes more than just shingles to create a high-performance roof. It requires a system of products working together. The Owens Corning™ Roofing System is a lineup of key products that can help provide maximum durability for your roof. And the most protection for your home.

- a** **VentSure® Ventilation Products.** Help protect a roof from premature failure by helping remove heat and moisture from the attic. 
- b** **PINK FIBERGLAS™ Blown-In Insulation.** Tiny air pockets trapped in the insulation resist the passage of heat flow.
- c** **Owens Corning™ Hip & Ridge Shingles.** Help protect the ridge vent and add an attractive, finished look to a roof's hips and ridges.
- d** **Owens Corning™ Shingles.** Add durable beauty to a home. Shingles are the first line of defense against the elements.
- e** **Owens Corning™ Felt Underlayment Products.** Add an extra layer of protection between the shingles and the roof deck to help prevent damage from wind-driven rain.
- f** **WeatherLock® Self-Sealing Ice & Water Barrier Products.** Help guard vulnerable areas where water can do the most damage to a roof: eaves, valleys, dormers and skylights.
- g** **Owens Corning™ Starter Shingle Products.** The first step in the proper installation of shingles.
- h** **RapidFlow™ Gutter Drainage Protection.** Keeps leaves and other debris from clogging gutters, while allowing water to flow freely off of the roof and through gutters.
- i** **Undereave Ventilation Products.** Help prevent moisture buildup in the attic by working with ridge vents to keep air moving.

Once you decide on a shingle style, we encourage you to shop around to find a contractor you can trust—one who offers proven experience and will provide a written estimate. For the utmost assurance, have your new roof installed properly by an Owens Corning™ Preferred Contractor. In order to achieve that distinction, a contractor must meet our strict program criteria. **To find a Preferred Contractor near you, call 1-800-GET-PINK® or visit www.roofing.owenscorning.com.**

Duration® Series Shingles Designer Colors Collection

* 130-MPH wind resistance only applies to *Duration* Premium shingles. 110-MPH wind resistance only applies to *Duration* shingles. See actual warranty for complete details, limitations and requirements.

** Color blends is a term that describes the intensity and amount of colored granules on the shingle, which can be more visible over the entire roof deck than in a small photographic swatch.

† Owens Corning strives to accurately reproduce photographs of shingles. Due to manufacturing variances, the limitations of the printing process and the variations in natural lighting, actual shingle colors and granule blends may vary from the photo. The pitch of your roof can also impact how a shingle looks on your home. We suggest that you view a roofing display or several shingles to get a better idea of the actual color. To accurately judge your shingle and color choice, we recommend that you view it on an actual roof with a pitch similar to your own roof prior to making your final selection. Color availability subject to change without notice. Ask your professional roofing contractor for samples of colors available in your area. The Cultured Stone® product colors you see are as accurate as current photography and printing techniques allow. We suggest you look at product samples before you select colors. A printed rendition of painted substrates can only approximate the actual color of the painted surface. Color accuracy is ensured only when tinted in quality Benjamin Moore® paints.

†† *Tru-Bond* is a proprietary premium weathering-grade asphalt sealant that is blended by Owens Corning.

‡ 50-Year Limited Warranty on commercial projects.

‡‡ Applicable in Medina and Minneapolis areas only.

SureNail Technology Patents Pending.

Designer Colors Collection

Duration® Series shingles with SureNail® Technology: A technological breakthrough in roofing.

Compare the shadowing and texture choices we offer in the *Duration* Series shingle line. Whichever *Duration* shingle option you select for your home, you'll rest easy knowing that your new shingles come with our *SureNail* Technology built right in. This product breakthrough offers you:

Supersealing Action

Our Tru-Bond™ sealant grips tightly to the nailing strip on the shingle below for greater bonding strength. *Duration* Premium shingles with *SureNail* Technology are rated for **130-MPH*** winds, and *Duration* shingles with *SureNail* Technology are rated for up to **110-MPH*** winds.

SureNail® Wider Nailing Area

New, wider nailing area allows for an improved and consistent installation.

Extra Adhesive Power

Specially formulated, extra-wide adhesive bands help keep shingle layers laminated together in virtually all weather conditions.

Harmony

When it comes to your home's exterior, you carefully consider the paint color. The trim. Even the landscaping. But did you know that your roof makes up a significant portion of your home's appearance? That's why updating your roof with Owens Corning™ Duration® Series Shingles Designer Colors Collection is about more than function. It's a great opportunity to bring your home's accents together—improving its aesthetics and perceived value.

The Designer Colors Collection offers two choices. *Duration* Premium shingles, our best option, offer maximum vibrancy, have a Limited Lifetime Warranty* and can withstand winds up to 130 MPH.* *Duration* shingles give you vivid color, have a 30-Year Limited Warranty* and can stand up to 110-MPH* winds. Both feature the high-performance durability of SureNail® Technology with supersealing action. And you won't find these designer colors anywhere else.

You'll be amazed at the difference our Designer Colors Collection can make. This brochure will show you how different shingle colors can dramatically change the appearance of your home. If you're really into color, the Designer Colors Collection is the ideal shingle for you—offering dimensional tone and texture that work beautifully with a variety of color palettes.

Whether you're looking to add more drama to your home or give it a knockout new look, *Duration* Series Shingles Designer Colors Collection offers brilliant impact and curb appeal like you never imagined. And when your home's exterior elements work in harmony, the look will be vibrant, cohesive and undeniably spectacular.

A new roof. And a whole new look.

The Designer Colors Collection does more than give your home's façade a lift. It also allows you to make changes to your paint and other accents over time without the need to change your shingles. That's because each shingle is made up of several color granules that inspire imaginative color palettes in warm and cool tones. When viewed from a distance, these brilliant granules can unify all of your home's details, like brick, stone, paint, shutters, siding, stucco and more.

Our Designer Colors Collection is so uniquely beautiful that we wanted to help you think about color and texture in a whole new way. So we enlisted renowned color guru, Lee Eiseman, to develop two inspirational color palettes for each shingle color. Eiseman is the executive director of the Pantone Color Institute and author of six books about the impact of color in our world. To develop her signature color schemes, Eiseman considered everything from paint to architectural accents. As you look through this brochure, be sure to note Eiseman's inspirational color palettes, which reference Benjamin Moore® paint colors.

Which color best complements your home's exterior details?

Try a few on and see. Our design visualization software lets you experiment with how different shingles, siding and Cultured Stone® manufactured stone veneer might look on a home similar to yours. To get started, visit ocdesignyeq.com. And imagine what a difference the Designer Colors Collection can make for your home.

See how Lee Eiseman's inspirational color palettes for Summer Harvest® offer you three different looks for dramatically revamping your home's exterior.

Sand Dune

Relaxing tan, taupe and pale blue tones unite to create a shingle that is naturally elegant and beautiful. Designer Colors Collection shingles in Sand Dune have the warmth of beachy, toes-in-the-sand afternoons.
